### LED Streetlight Project: Phase I Completed

Following a successful pilot program, which included resident evaluation of potential LED streetlight solutions, installations for Phase I of the [LED Streetlight Conversion Project](#) have been completed along the following higher volume roadway locations:

White Plains (Post) Road  
Mamaroneck Road  
Heathcote Road, between White Plains (Post) Road and Heathcote Five Corners  
Weaver Street

The first phase also included retrofit of locations featuring Town and Country post-top style streetlights.

[Phase I savings](#) are estimated to exceed \$25,000 per year, resulting in a payback period of approximately 3 years. Over 300 streetlights were converted to LED, and all removed streetlights were recycled.

The [Ad-Hoc Committee on LED Streetlights](#), comprised of Village Staff and resident volunteers, is currently reviewing fixture options for Phase II of the LED Streetlight Conversion Project. The Phase II pilot, which is planned for this summer, will focus on select residential streets and feature opportunities for public feedback; additional details will be published once available.

For any questions or feedback, please contact the Ad-Hoc Committee on LED Streetlights at [LED@scarsdale.com](mailto:LED@scarsdale.com)
